

THOMAS

Contemporary Smooth Edge Engraved

Meet Thomas, a door that delivers a completely re-imagined take on the classic herringbone pattern, with sleek lines and a bounding perimeter that accentuates its striking features. Influenced by mid-century modern design, without a complete departure from classic style, Thomas will look infinitely beautiful and relevant. Available in several configurations, the crafted feel of this door is beckoning to be brought to life with warm brown or ochre paint or kept neutral with charcoals, black or white.
