

# UPGRADE TO A CUSTOM SLAB SIZE

Take on more custom projects with confidence, improving margins while reducing production time and complexity.

## NO EFFORT REQUIRED

### CUSTOM SIZES

Built to your exact width and height

### ELIMINATE REWORK

No trimming. No reassembly.

### READY TO HANG

Delivered ready from the factory

## WHY IT MATTERS

- ✓ Instead of spending time customizing the slab(s) your team spends time hanging and finishing more doors.
- ✓ Instead of absorbing more labor costs to remove quality from the product, you preserve the quality of the slab and increase capacity for more orders.
- ✓ Instead of managing rework, risking warranty claims or dealing with unhappy customers you deliver consistent, repeatable quality on time.

## YOUR CURRENT PROCESS

### MODIFYING A STANDARD SLAB TO MAKE A CUSTOM SIZE

#### Extra Handling at Every Step

- Skilled labor tied up on non-value work
- Disrupts production flow
- Increased chance of error or scrap
- Inconsistent results from rework

## ORDERING A CUSTOM SLAB FROM MASTERGRAIN

#### Minimal Handling Required

- Factory direct, built to size in 1/8" increments on height, width or both.
- Clean, streamlined workflow
- No trimming or edge finishing required
- Consistent slab integrity and finish
- Labor focused on value-added work
