

MASTERGRAIN™

REDEFINE YOUR DOOR

TRENDING DESIGNS AND
INSPIRATION FOR YOUR HOME

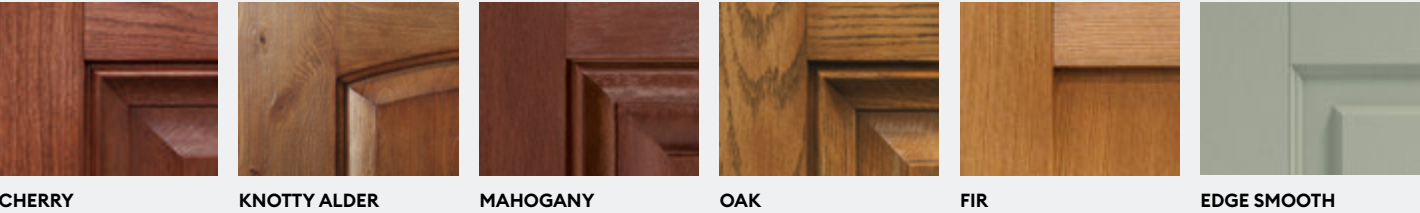

BETTER THAN WOOD. IT'S MASTERGRAIN.

Every MASTERGRAIN™ door panel begins with real wood. Using Nickel Vapour Deposition (NVD) technology, we capture the natural grain, texture and depth of genuine wood and transfer it into a durable fiberglass surface.

The result is a door that gives homeowners the rich, authentic look of wood with the lasting performance of fiberglass.

UNMATCHED GRAIN VARIETY

SCAN TO WATCH
The MASTERGRAIN Origin Story

BEAUTY & PERFORMANCE THAT STAND THE TEST OF TIME

Only MASTERGRAIN gives homeowners the freedom to create a beautiful entryway without compromising on long-term performance.

Our fiberglass door panels and components are designed to resist warping, rusting and deterioration, helping your door maintain its shape, fit and finish over time. That means a more reliable entry system, fewer service concerns and lasting curb appeal long after installation.

MASTERGRAIN Fiberglass **VS.** Traditional Wood Door

MASTERGRAIN fiberglass doors are indistinguishable from natural wood doors.

MASTERGRAIN fiberglass doors resist warping, splitting, cracking, rot, and insects much better over time.
